

Dongguan Jinsheng Mold Plastic Co., Ltd.

Company vision: to become a reliable enterprise for customers and employees

Company mission:

Contribute to customers, establish life for the enterprise, and establish a heart for the society

Company History

2022

Injection molding and assembly scale expansion, production capacity increase, There are about 360 employees.

2020

Established Hepoosi Medical Technology Co., Ltd., expanding the scale of injection molding and assembly, increasing production capacity, and employing about 300 people.

2017

Started to develop CONTIGO, KAMBUKKA, LIFETIME and other internationally renowned household products brands and domestic well-known sports brand turnbuckle OEM.

2016

Purchasing factory buildings, combining the mold factory and injection molding factory into the same factory area, Added a new manufacturing department with about 210 employees.

2011

Established injection molding factory with about 120 employees.

2006

The scale of Jinsheng mold processing factory was expanded and the company was established, with about 80 employees.

2004

Jinsheng Mold Processing Department was established with 22 initial employees.

About Us

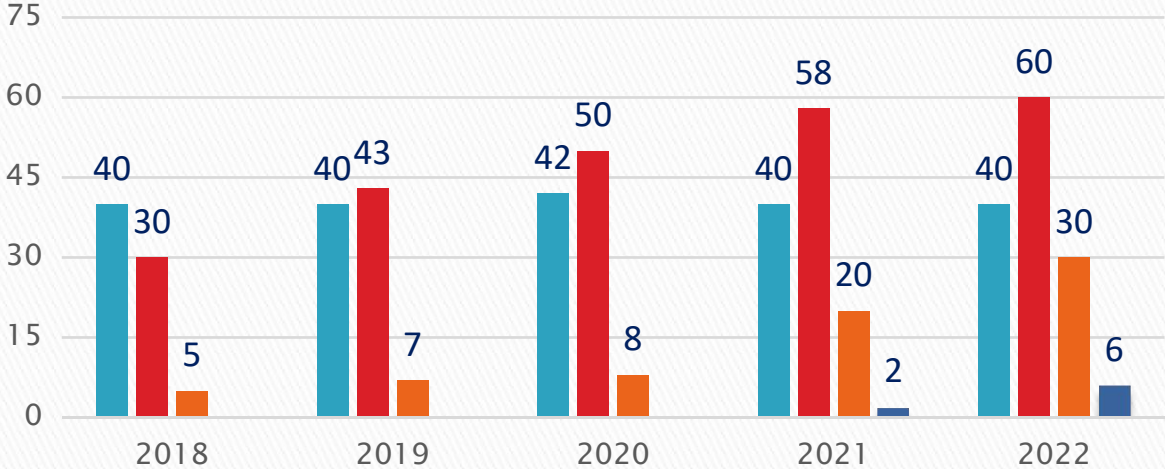

- The factory was established in 2004;
- There are about 360 employees, including more than 80 Technical personnel of various experts.
- Plant construction area of 26,600 square meters;
- Focus on Dental, Medical consumables, Automotive, Industrial, and Household products;
- Proficient in all kinds of precision Plastic Molds, Stack Molds, T Molds, Multi-Cavity Molds, Two-Color Molds and Gas-assisted Molds;
-  IKEA Qualified Mold suppliers;
- Passed the Quality certification system of ISO9001: 2015 & ISO14001 2015 and 13485/15378/IATF16949;
- QS National Industrial Product/ Production license.

Mold capacity

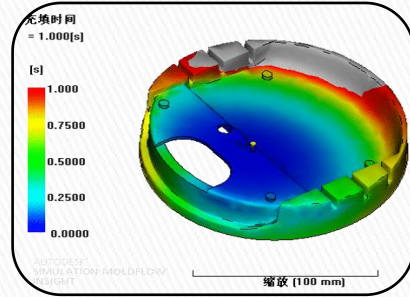

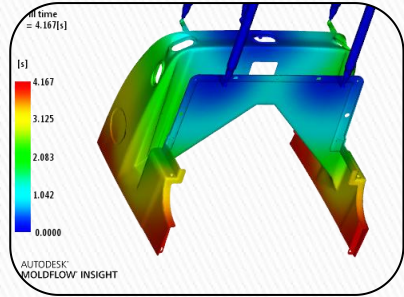

- Mold life: 0.3M-3M shots
- Capacity: 20-25 Sets/Monthly
- Ship to local and Oversea market
- Maximum Mold size can be fitted to 2,000T Injection Machine(Max. Weight of Mold 15T)
- Tolerance: +/- 0.005mm
- About 80 experts in Mold House, 18 experts in Design room
- More than 20 years experiences in Molding field

Mold Flow Analysis

- Simulation of Computer Simulation Mold Injection Molding Process
- Evaluate the feasibility of the scheme through the simulation results and discover potential problems
- Improve the mold and product design scheme to improve product quality
- Shorten product development time and achieve cost reduction

Mold design and manufacturing capabilities

Design Software: Uni-graphic, Pro E, ZW 2D/3D
AutoCad, PowerMill, MoldFlow,
Tolerance: +/- 0.005mm

(Makino) EDM

(Sadick) Wire Cut

(XHJ) CNC Machine

(BJJD) CNC

Injection processing capacity

- 93 sets of Injection Molding machine
- Machine Capacity 40-680T
- Machine Brand: Japan Toyo, Haitian, Zafir, Sumitomo
- Gas Assisted Molding
- Overmolding
- Central Material Supply System

CMM Equipment

2D Projector

Laboratory

- Constant temperature and humidity testing machine
- Salt spray test machine
- Single arm drop test machine
- UV aging test machine
- Tensile testing machine
- Aging Test Dishwasher metal detection machine
- Transport vibration test
- Bench Torque Tester
- Aging test
- Dishwasher Lid Button Life Test
- Cup cover slingshot life test bench

Quality Assurance

Quality Certification

- ISO 9001
- ISO 14001
- ISO 13485
- ISO 15378
